

Assignment T4: Initial Demo

Unleash Shirish

Roopa Bhat - rsb2178

Sarah Hancock - seh2209

Julian Goldberg - jg3796

Sophia Kolak - sdk2147

Shirish's Comments

Demo

- If trial creation doesn't work (email is not sent) → need some sort of visible error
 - Email and trial should happen at same time (so trial should not be created if email has not been sent)
- Put name of trial (instead of start date/end date) on researcher dashboard
- Participant should not see how many participants are needed/confirmed (only researcher should see it)
- Email sending!!
- Date in create trial - create restriction on input (until 2100)
- IRB number - change it to allow alphanumeric
- Date of birth instead of age (should change if a user has an account for >1 year)
- What happens if researcher updates info but participant has already accepted → send notification saying requirements have changed (no longer in trial)
 - Researcher gets notification saying someone dropped out

Presentation

- Add slide on why wouldn't we use the other apps that are out there
- Change the heart icon on slide 4 → change it to a smiley face :)
- Numbers instead of bullets for features

Part 1: The date and time at which you already completed this demo, and briefly describe any challenges that arose during the demo.

Date of meeting with IA Mentor: Sunday, November 22 @ 12 PM

Challenges:

- Email sending did not work (although it worked when we tested it right beforehand)

- Going to fix that for our demo on Tuesday in class (we're going to pre-record demo!)
- Submitting new trial form didn't work one time (there was no visible error even though a trial was created on the dashboard)

Part 2: A link to the github repository where the entire codebase resides.

<https://github.com/sophiakolak/4156-team-project/tree/master>

File Revisions

- Changed [participant dashboard](#) and [researcher dashboard](#) to display trials correctly, added buttons to accept and reject match
- Fixed endpoints and updated email service in [TriAll.java](#)

Part 3: A link to the folder in the repository that includes all the prose submissions thus far for this course.
