

Assignment T6: Final Demo

Unleash Shirish - Clinical TriAll

Roopa Bhat - rsb2178

Sarah Hancock - seh2209

Julian Goldberg - jg3796

Sophia Kolak - sdk2147

Shirish's Comments:

- Should not be able to make min weight 100 and max weight 3 (add check on back end)
- Remove accept button when trial moves to upcoming trials (after accepted)
- Accepted trials only appear when signing in/out not on refresh
- Can't edit a trial (need to make a new trial)
- If the number of participants are reached, then the trial doesn't show up for anyone else (works!)

To Do:

- Adding integration tests
- Add validation for minHeight, maxHeight on backend
- Upload branch coverage report
- Change README
- Change directory name of database (units → database)

Part 1:

The date and time at which we completed the demo: **Wed, Dec 9 @ 11 am**

Challenges that arose during the demo:

- Form values validation on front end and back end!

Part 2: A link to the github repository.
